Tips on applying for a job

Companies put a lot of energy into attracting, selecting, developing and rewarding performers who deliver on their commitments. As a result, the companies want you to put just as much energy into your application.

When you apply for a position, your CV and covering letter are your only chance to show the company why they should consider employing you. Remember, you will be one in possibly hundreds of applications they receive. The selection panel may only read over your application for 5 minutes so you need to ensure they put your CV in to the ‘maybe’ pile for further consideration.

Before you even start to write your application letter research the company and the position

- Where is the company located,
- Are you prepared to relocated if the company is located in another state or has offices in another state,
- Are you interested in the type of work the company undertakes,
- Are you interest in travel if this is indicated in the position description
- Consider what is important to you in the work environment. Does this align with the company’s values?
- Read the company website to find out their key employment areas.
- Read over the company’s “Vision” statements and think through what you can offer the company and what they can offer you. Make a list of these for the interview (dot points).
- Study the job description and think through why you could be the ideal candidate.
- Always check your CV for spelling and grammatical errors - a good CV will make you stand out. Ask a few people to proof read your letter and CV. Do NOT, under any circumstances, use TXT language in your CV or application letter.
- Keep your application letter simple and clear. Remember that people want to discover your strengths without being overloaded with information. Companies are only interested in your tertiary studies so listing copious amounts of achievements from high/primary school will detracted from your application.
- Include a photo of yourself. However, don’t have a photo that detracts from your CV and letter. It is NEVER a good idea to have a photo with the “sexy bedroom pout” on your CV!
- Cover only the main points in your covering letter: why you want to work for the company, why you are qualified and a little personal background relevant to the vacancy for which you are applying.
- Include your email address as well as your contact number(s) on your CV.
- Most systems are electronic, so use the company’s Internet site to submit your application. If you experience problems submitting your application, then ring the company for help. If for some reason your application is not uploading ask for an email address to send it to. Ask in the email for a confirmation that your application has been received. If you don’t get a reply then call and ask if they have received it.

In your letter, be honest, clear, and concise - show your enthusiasm for the position you are seeking. It is better to have one page of relevant information than three pages of unrelated information to the position being advertised.

Preparing for an interview:

- Familiarise yourself with the company business. Use their website - it is there for you to learn about the company.
- Know yourself - know your strengths and understand your weaknesses. Be prepared to answer questions about yourself, your background and your motivations. Make a list of possible interview questions the selection panel may ask you and practise them e.g.:
  - Why do you want to work for “Company Name”,
  - What can you offer “Company Name”,

Page 2
- What did you gain from your vacation work experience with “Company Name” etc.
- Where do you see yourself in 2, 5 and 10 years time
- What are your strengths?
- What are your weaknesses?
- Are you prepared to travel?

- Bring extra copies of your CV to the interview. One to share with the interviewer and one for you to refer to in case you need it - you will feel more confident and prepared.
- Relax. Take a few moments before answering each question. Keep your responses clear and concise. Remember it is not the length of your answer but its quality which will win you the job.
- Make a list with a few questions to ask the interview panel and don’t be afraid to refer to it when asked for your questions. This shows you are prepared
- Dress well for the interview.

If you are offered the position you must be as happy with the company as they are with you so do your research. There is not point applying for a position if your values are not the same as the employers.

**Graduate Recruitment Practices, Graduate Careers Australia [Summer 09/10 No. 16]**

- “For the third consecutive year, **interpersonal** and **communication** skills emerged as the most important selection criterion used in recruiting graduates.
  - This was rated as the most important criterion across all industry groups.
- **Lack of drive, motivation, enthusiasm and initiative** was considered by the majority of employers to be the least desirable characteristic in a graduate.
- A graduate’s **employment history** was considered by employers to be the single most important aspect of a graduate’s **curriculum vitae**.”

**Other services available to you**

**Employment and Career Development Team**
The programs aim to improve your career planning and job hunting skills. Attend as many of the events as possible to help you secure the career you want and deserve.

Defence Force Recruiting

What does your Company do? What industry does the company operate in and what are a few of the key products?
The Australian Defence Force (ADF) is a professional organisation with a culture that promotes innovation and teamwork. Engineering Officers in the Navy, Army and Air Force are challenged to reach their full potential and progress with rapid skills development through a variety of professional engineering positions. These leadership roles range from the management of multi-million dollar acquisition projects; maintenance and design engineering roles in support of the existing fleets of helicopters, tanks, ships and aircraft; through to rebuilding infrastructure as part of humanitarian operations overseas. You’ll have access to unique and emerging technologies as well as receiving extensive professional development through postgraduate opportunities, professional seminars and pathways to chartered success. A career in the ADF also gives you the opportunity to develop a large network of mentors, colleagues and friends. Choose a secure and diverse engineering job that: pays you more (approx $78,100 package plus additional benefits), invests time in your professional and personal development, enables you to work on some of the most exciting and significant engineering projects in the country, and has opportunities for travel within Australia and overseas. The Navy, Army and Air Force are looking for engineers who demonstrate leadership aptitude and strong interpersonal skills. Leadership and management development is a significant part of being a professional graduate engineer in the Australian Defence Force (ADF) and as such, Engineering Officer's are equipped with the skills and support required to lead and make decisions in diverse team environments from day one. This allows you to start in the middle of your career; puts you ahead of your industry peers; and gives you greater opportunities later on. If you’d like to find out more about Graduate engineering opportunities visit www.defencejobs.gov.au, call 131901 or send an email to engineers@dfr.com.au.

What is the global extent of your company?

- The extent of ADF international operations can be found on www.defence.gov.au.

Mars Australia

What does your Company do? What industry does the company operate in and what are a few of the key products?

With a turnover exceeding $1 billion we are one of Australia’s leading consumer brands companies, supplying local and export customers with high quality Food, Petcare, and Snackfood products. Although most of our sales are in Australia, we export to more than 30 countries around the world. Our Australian business began when we commenced selling the MARS® bar here in 1954. Our first factory was built in 1967, and since then we have grown significantly. We now have six manufacturing sites across Australia, and employ more than 2,000 associates. Whether it’s the simple pleasure of savouring the world’s best-loved chocolate and confectionery, the warmth that a healthy and contented pet brings to your family, or the rewards that come from creating fantastic tastes in your own home, Mars is the company behind many of the enduring brands Australians have come to know and trust. These brands include MARS®, M&M’S®, SNICKERS®, TWIX®, MASTERFOODS®, DOLMIO®, KAN TONG®, PEDIGREE®, WHISKAS®, MY DOG® and DINE®

What is the global extent of your company?

Michael Page International

What does your Company do? What industry does the company operate in and what are a few of the key products?

Michael Page International is a leading professional recruitment consultancy specialising in the recruitment of permanent, contract and temporary positions on behalf of the world’s top employers. The Group operates through 142 offices in 28 countries and 3,702 employees worldwide. First established in London in 1976, we’ve been bringing job seekers and employers together for more than 30 years. We opened our first office in Australia in 1985 and currently have offices in Melbourne, Wheelers Hill, Sydney, Chatswood, Brisbane and Perth. In 2010, our Engineering & Manufacturing recruitment division will be looking to recruit a number of engineering graduates with some level of work experience who are keen to develop a career in recruitment. Candidates must have a strong desire to work in a sales environment, have excellent communication skills, exhibit strong leadership qualities and have a passion for wanting to work in a close knit team environment. Your role, in short, will be to recruit engineering & manufacturing staff for large, medium and small companies in Australia. You will specialise in a specific industry sector/s and salary band and work with a large team of like minded consultants who also recruit in the Engineering & Manufacturing space.

MWH Australia Pty Ltd

What does your Company do? What industry does the company operate in and what are a few of the key products?

MWH, globally driving the wet infrastructure sector, is leading the world in results-oriented management, technical engineering, and construction services to create a better world. Operating as the strategic thought leader in our industry, our purpose, goals and core values recognize that wet infrastructure covers a broader range than simply water. Global megatrends - climate change, scarcity of resources, aging infrastructure, and technological innovation - are all tied. Today, MWH is a multi-disciplined global team of program managers, business consultants, engineers, geologists, operators, scientists, technologists and regulatory experts all contributing toward providing our clients solid solutions that reflect best practices in wet infrastructure knowledge, experience and innovation.

Woodside Energy Ltd

What does your Company do? What industry does the company operate in and what are a few of the key products?

Woodside is one of Australia’s top ten companies by market capitalisation, and the nation’s largest publicly-traded oil and gas exploration and production company. Based in Perth, Western Australia, Woodside has major operational assets and exploration and development interests in five continents including Australia and the United States. In 50 years we have grown from a pioneer oil and gas explorer to Australia’s largest independent producer of oil and gas and one of the world’s largest producers of LNG. Woodside operates Australia’s largest resources project, the North West Shelf Venture in Western Australia, which produces about 40 per cent of Australia’s oil and gas. In 2010, Woodside will complete construction of its Pluto LNG Project near Karratha – Australia’s second biggest resources project. Woodside is also seeking to progress its Sunrise LNG development in the Timor Sea and the Browse LNG development in northern Western Australia. With proved plus probable reserves to production ratio of 25 years at 2007 production rates, Woodside is poised to help meet growing global demand for clean energy.

What is the global extent of your company?
International, Based in Perth, Western Australia, Woodside has major operational assets and exploration and development interests in five continents including Australia and the United States.
