Monash University undertakes hundreds of research projects relevant to Victoria’s transport system every year. The aim of this outreach event is to break down the barriers between academia and the people developing and implementing transport and planning policy and initiatives in Victoria. Come learn what research Monash University is currently doing and how we can work together to improve Melbourne and Victoria’s transport systems.

The Monash Research Roadshow – Transport Industry Outreach Event will cover more than 40 topics on transport including: advances in public transport research, resilience science in transport, product design futures in transport planning, optimisation discoveries in transport operations, and futures in road safety research.

The event includes just over one hour of speed presentations followed by an hour-long reception including poster papers where you will have the opportunity to discuss research with the Monash team over drinks and nibbles.

The venue is the Ground Floor Auditorium, Monash University Law Chambers, 555 Lonsdale Street Melbourne. Directions for public transport and parking can be found here.

Registration is essential. Spaces are limited. Please RSVP by Wednesday 22 July 2015 by completing the online form.

If you are unable to attend, please feel free to forward this invitation to a colleague who may be interested in attending.

We look forward to seeing you there.

Professor Graham Currie
Chair of Public Transport
Public Transport Research Group
Institute of Transport Studies
